

News Release: Help shape the future of Dacono.

September 28, 2018- The City of Dacono is seeking resident's input through the upcoming Dacono Resident Survey. The Resident Survey provides residents the opportunity to rate the quality of life in the City, as well as the community's amenities, service delivery and their satisfaction with local government. The survey also permits residents to provide feedback to government on what is working well and what is not, and to communicate their priorities for community planning and resource allocation.

The City is partnering with the National Research Center, Inc. who will administer the 2018 Resident Survey as they are the gold standard in community assessments today. This benchmarking, community survey provides a comprehensive and accurate picture of community quality and resident perspectives about local government services, policies and management.

The City of Dacono conducted its first resident survey in 2015 as part of the comprehensive plan update process. Through the survey, residents rate city services and the quality of life in Dacono. They also give their opinions about some specific issues and potential projects. The survey is conducted via mail, or by using an online code. The results provide valuable feedback to the City Council about Dacono's ongoing services. The data collected is used to determine whether the city is meeting citizens' expectations and areas where improvements could be made and helps prioritize and guide local government policy and initiatives.

The City has a few reminders regarding this survey.

- The responses are completely anonymous.
- To hear from a diverse group of residents, the adult 18 years or older in your household who most recently had a birthday are asked to complete this survey.
- The survey can be returned by mail using the enclosed postage-paid envelope, or it can be completed online.

Surveys will be sent in two waves to random residents beginning Monday, October 1st and they are due no later than November 12th. With any questions please contact 303-833-2317.
