

Anadarko Petroleum Corporation
P.O. Box 173779
Denver, CO 80217

Hello,

We are writing to provide you with an update on our planned operations at the Carson well pad in Dacono (please see the map on the reverse side for the locations of the pads).

Our team members have been constructing the pad locations to provide a level working surface for our equipment and to install protections for the environment. Starting in late April, a drilling rig will begin the underground well construction process by installing steel pipe and cement (surface casing) to protect groundwater. Then, with a production rig, we will drill our wells to a vertical depth of 7,000 to 8,000 feet underground before extending our wellbores horizontally. We anticipate horizontal drilling to begin in late May and to extend through early August, and you may see two drilling rigs in the area simultaneously for these well pads. You will receive additional communications from us as plans to conduct hydraulic fracturing, facility construction, and reclamation progress.

If at any time you would like more information or wish to report an issue related to our operations, please feel free to contact us through the Anadarko Colorado Response Line (1-866-248-9577 or AnadarkoColorado@Anadarko.com). We welcome your feedback at any time as we perform work near your community.

Sincerely,
Stakeholder Relations Team
