

ADDENDUM NO. 1

Notice to consultants for the below referenced project.

Frederick – Dacono OSP Town of Frederick, Colorado

Issued by Gary Odehnal / Kevin Ash: 5/18/2020

The RFP documents are hereby amended and or updated for the following plans additions and or clarifications:

1. The consultants are notified that all LIDAR topo data is available for the DRCOG or the Weld County GIS department. Both towns have various sections of this data, but not the complete set of data. Please contact these entities to collect this data.
2. Figure 1 from the RFP has been revised to clarify the extents of the basins. Most notable are the division between the upper and lower Idaho Creek basins. There are also clarifications for the size and location of the upper and lower Boulder Creek basins. Note the lower Boulder Creek basins will be limited to just the area within the Frederick Town limits.
3. Also included is a sample cost breakdown spreadsheet. The consultants are requested to submit their project costs broken out by basin and by the basins proportional cost in each municipality. Consultants can complete costs by tasks as outlined in the RFP, but we will need combined costs broken down as shown in the enclosed table.

All consultants will be required to submit acknowledgement of this addendum in the cover letter of their Proposal. Or scan and send a copy to KAsh@frederickco.gov before the RFP Opening date.
